

A PRODUCT OF NERGE PRO SUITE

Hotel & guesthouse management system

Reservations · Billing · Restaurant & bar · Housekeeping · Reports

Run your whole hotel from one system.

Everything works together, so a restaurant order, a laundry bag or a taxi ride lands on the right guest's bill. We set it up around how your property runs, and train your team to use it.

WHAT IT DOES

- **Front office & reservations**
Bookings, arrivals and departures, check-in and check-out, group bookings and a live room grid.
- **Restaurant, bar & guest services**
Orders and room service, plus laundry, transport and other services charged to the room.
- **Reports & finance**
Daily sales, cash and management reports as PDF or Excel on your own letterhead.
- **Guest billing & payments**
One bill per guest. Receipts and invoices, with control of discounts and refunds.
- **Rooms & housekeeping**
Know which rooms are ready, dirty or out of order, and keep maintenance moving.
- **Control & peace of mind**
The right access for each team member, a record of who did what, and scheduled backups.

HOW TO GET STARTED

- 1 Book a demo**
We walk you through the system using your kind of property.
- 2 Try a proof of concept**
A short trial with your rooms, rates and menu, with your own team.
- 3 Go live with training**
We set it up (usually in 24 to 48 hours), bring your data across and train your staff.

PART OF THE NERGE PRO SUITE

Book a demo today

24-hour support, no transaction fees. Built in Ghana, customised for other countries on request.

Nerge Stay Pro is a product of Nerge Pro Suite, developed by G2 Computech.
